Rockey's book describes a 4-triode (2 each 6SN7, for example)  
regen set which looks good to me, especially for the grounded-  
grid input stage.

If anyone has built this set, I'd appreciate comments before  
I move from parts collecting to the assembly stage. Once I  
start punching the chassis, I'm sorta committed!

tnx & 73 de WB6BYH
